

The Emerson

SECOND FLOOR BEDROOM SUITE OPTION

1555 SQ. FT. LIVING SPACE
205 SQ. FT. TERRACE

This option:

- Creates a large Bedroom Suite
- Can be customized in several ways, including flipping the functions so that the bedroom area moves adjacent to the kitchen and the “suite” area shifts to the end of the unit
- The interior wall between the bedroom and suite areas can be part or full height, solid, a screen, glass blocks, or simply a large piece of furniture
- Kitchen becomes less deep but wider to maintain roughly the same cabinet/counter space
- The Great Room open space remains unchanged from the standard layout

Note:

This plan is for a two-story end unit. Windows shown on this exterior wall apply only in end units.
